## 💼 Employment History

### Full Stack Developer at MightyHomes, Freelance Remote

February 2023 — June 2023

- Collaborated with a startup company to develop and launch a Next.js application that leverages the ControlNet ML model to generate diverse room variations based on user-uploaded photos.
- Played a key role in designing and implementing the AI-powered tool, ensuring seamless integration with the existing development infrastructure and collaborating closely with the development team.
- Contributed to the full software development life cycle, including enhancing core functionalities, refining the user interface, and conducting thorough testing to deliver a high-quality and user-friendly application.

### Web/Mobile App Developer, Project-based

2018 — 2022

- Developed front-end user interface for Web and mobile applications using React and React Native, resulting in over 30 satisfied clients and a perfect 5-star rating from all 20 reviews.
- Collaborated with designers to make UI/UX design decisions and created mockups as needed, resulting in user-centered designs.
- Implemented and integrated back-end APIs using Node.js and Firebase, ensuring seamless communication between the front-end and back-end, and enabling the apps to provide dynamic content and real-time updates to users.

### Entrepreneur at Visionomatic

2016 — 2022

- Handled client data and met tight deadlines while working in a stimulating, high-pressure environment.
